PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, building, and scaling web and cloud applications across the JavaScript/TypeScript and Java ecosystems. Strong expertise in Node.js, React, Angular, Java, and Spring Boot, delivering RESTful APIs, microservices, role-based access control (RBAC), and cloud-native solutions on AWS and Azure. Skilled in database design (PostgreSQL, MongoDB), performance optimization, Docker, CI/CD, and Agile/Scrum delivery. Recognized as Best Performer and Key Contributor for consistent, high-quality delivery and technical leadership.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL, HTML5, CSS3

Frontend: React, Redux, Angular, Next.js, React Native, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, Spring Boot, REST APIs, Microservices, JWT Authentication, RBAC, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, SQLite, Sequelize ORM, Mongoose

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, SDK v3), Microsoft Azure, Docker, CI/CD, Git, GitHub

Practices & Tools: Agile/Scrum, System Design, Microservices Architecture, Unit Testing, Code Review, Postman, Jira

PROFESSIONAL EXPERIENCE

Angular Minds Pvt Ltd

Pune, India

Software Engineer · Full-Stack Developer

Jul 2024 – Present

Junior Software Engineer · Full-Stack Developer

Jul 2022 – Jun 2024

- Architected and delivered scalable full-stack web applications using React, Angular, Node.js, Express, and Spring Boot, serving enterprise clients across multiple business domains.
- Designed and developed secure RESTful APIs and microservices with JWT-based authentication and role-based access control (RBAC), standardizing authorization across 10+ modules.
- Built cloud-native solutions on AWS and Azure, including a multi-account, multi-region cost-optimization and billing platform that processed usage data via AWS SDK v3 and Azure APIs.
- Optimized backend performance through PostgreSQL query tuning, indexing, connection pooling, and asynchronous background jobs, reducing average API response times by ~40%.
- Led code reviews, defined engineering best practices, and mentored junior developers, improving code quality and team delivery velocity.
- Containerized services with Docker and contributed to CI/CD pipelines for automated, reliable, and repeatable deployments.
- Partnered with cross-functional teams in an Agile/Scrum environment to translate business requirements into well-tested, maintainable technical solutions delivered on schedule.

KEY PROJECTS

Moneta — Cloud Monitoring & Billing Platform

Tech: React, Node.js, Express, PostgreSQL, AWS SDK v3, Azure API, TypeScript

- Built a cloud cost-optimization platform processing billing and usage data across multi-account, multi-region AWS and Azure environments.
- Implemented automated scanners for unused resources using cross-account IAM roles and parallel, region-aware discovery; delivered RBAC-secured React dashboards and reporting APIs.

Clipboard Manager — Linux Clipboard History App

Tech: Electron, React, TypeScript, Node.js, SQLite, Tailwind CSS

- Developed a keyboard-driven clipboard history manager for Linux (GNOME/Wayland) as an Electron desktop app with instant search and paste.
- Engineered a background watcher storing entries in a local SQLite database with deduplication, pinned items, and fuzzy full-history search; distributed as AppImage and .deb packages.

Parental Control Application

Tech: Next.js, React Native, Node.js, Express, PostgreSQL

- Built a cross-platform parental control app with secure parent-child account linking and supervised access control.
- Implemented JWT authentication, role separation, real-time usage reports, and configurable screen-time restrictions backed by scheduled background jobs.

AM Books — Enterprise Management System

Tech: Angular, Node.js, Express, MongoDB, Sequelize

- Delivered a full-stack enterprise system with RBAC, admin-managed permission mapping, and invoice/quotation generation.
- Automated email notifications via scheduled jobs and built interactive dashboards with real-time employee status insights.

EDUCATION

Master of Computer Applications (MCA)

Jun 2022 – Mar 2024

Savitribai Phule Pune University — PES Modern College, Pune · Grade A · 70.46%

Bachelor of Computer Applications (BCA)

Jun 2019 – Mar 2022

Savitribai Phule Pune University — PES Modern College, Pune · Grade A · 70.46%

CERTIFICATIONS

- AWS Academy Graduate — Introduction to Cloud (AWS Academy, 2022) · Verified badges: credly.com/users/suraj-kolhe

AWARDS & RECOGNITION

- **Best Performer — Angular Minds, 2025.** Outstanding individual performance and consistent, high-quality delivery.
- **Best Team — Angular Minds, 2025.** Recognized as part of a high-performing team for collaboration and on-time delivery.
- **Key Contributor — Angular Minds, 2024.** Significant technical contributions to team and project success.
